V1.1.1 Release Notes - LiveEdge® Cloud Control

2024-01-11 V1.1.1

Features

> **Secure Data Storage:**
  - Enables configuration of encryption keys and stream password in Cloud Control the same way the local UI offers.

> **Dynamic Inputs, Encoders, and Outputs:**
  - All 3 can be created, configured, and deleted in Cloud Control with equal/similar configuration capability as the local UI.

> **MBR Support:**
  - Enables configuration of Multi-Bit-Rate ladders in Cloud Control for relevant outputs.

General Maintenance / Improvements

> Limit to 30 FPS with Closed Captions performance warning removed.
> Encoded Video Resolution displays properly in the Cloud UI as the Encoder Status field.
> Can now view organizations in amounts of 10, 25, 50, and all.
> Update User role permissions to more accurately reflect an Organization Admin vs User vs Read Only.
> General updates to support LiveEdge® Max in Cloud Control UI.
> "RETRYING" label added for output status to avoid constantly switching on reconnect attempts.

Bug Fixes

> Timezone options consistent between local and Cloud Control UI.
> Can no longer select more than 6 audio channels for an Audio encoder.
> Disallow devices on Cloud Agent b44 from updating via Cloud UI:
  - Cloud agent V1.0.0b44 has known issues with updating that we are mitigating by disallowing users to do so.
  - Devices on b44 will have to update to Cloud Agent V1.1.1 by installing device software version 10.1 once it is released.
