

### 2026-02-16 V1.36.3

\* = Requires updating to the latest Cloud Agent Version

#### Feature Additions

- > **Password Protection for Local Web UI\***
  - **Product: Max 2 & Max**
  - Added support for Max 2 and Max products to have password protection enabled for the local Web UI. Local UI password protection may be managed via LiveEdge Cloud Control.
  
- > **Dual Ethernet Support\***
  - **Product: Max 2 only**
  - Added support for configuring the dual Ethernet interfaces on the new Max 2 hardware platform via Cloud Control.

#### General Improvements

- > **Updated Metrics Architecture**
  - The Cloud Control metrics have been updated to a more efficient, Videon-managed solution. Displayed metrics in Cloud show a total of 14 days of history. This data may be collected for users' records via API.

#### Known Behaviors

##### LiveEdge® Max 2 specifics:

- > Dual Ethernet
  - Route weight can be unpredictable. For most things, this is fine except SRT Listener. You may expect this to be on eth0, but it is actually showing up on eth1 interface.
