

V1.12.2 Release Notes - LiveEdge® Cloud Control

2024-06-05 V1.12.2

Feature Additions

- > **Cloud UI**
 - **Test pattern generator (LiveEdge® Max only)**
 - Added test pattern generator as a video input option
 - **Edge Apps tab**
 - Device admins able to access the Edge Apps tab on devices that have an unexpired LE-NODE or LE-MAX license to manage Docker containers on the respective device
- > **Cloud API and Agent** - Requires updating to Cloud Agent V1.12.2
 - **Storage device management (LiveEdge® Node only)**
 - Added storage device management commands in the device COMMANDS interface
- > **Cloud UI, API, and Agent** - Requires updating to Cloud Agent V1.12.2
 - **Zixi encoder back-pressure**
 - Added support for Zixi back-pressure in video encoders and Zixi outputs

Improvements and General Maintenance

- > **Cloud UI**
 - **Users tab only visible to admins**
 - Only org, fleet, and device admins can view the respective "Users" tab
 - **Output status update**
 - Added an icon with hover text to describe better why an output might not be streaming

Fixes

- > **Cloud UI**
 - Fixed LiveEdge® Max audio encoder configurations to properly show all 16 audio channel options
 - Updated SRT destination validation to allow underscores
 - Fixed Max video encoder configurations to only show Normal and Lowest quality/latency modes
