

V1.19.0 Release Notes - LiveEdge® Cloud Control

2024-09-25 V1.19.0

Feature Additions

- > **Cloud API and UI** - Does not require updating to latest Cloud Agent
 - **Fleet management V2**
 - New and improved fleet management including bulk actions, fleet-view configuration, and more
 - [Read our walkthrough article to learn more](#)
 - **Audio Test Pattern Generator Input**
 - Users can now select Test Pattern Generator (TPG) as their Audio source

Improvements and General Maintenance

- > **Cloud API and UI** - Does not require updating to latest Cloud Agent
 - **Docker container privileged mode**
 - When creating a Docker container via either the Cloud UI or API, users can now enable privileged mode
 - Read more here about the security considerations when using privileged mode for a container: [Container is running in privileged mode](#)
 - **VESA resolutions**
 - Users with the appropriate licenses can now select 1440p and 1200p as input and encoding scaling resolutions
 - **Org management changes**
 - Only Videon admins are now able to create, delete, and rename organizations
 - Users must submit support requests to have a Videon admin assist in creating, deleting, or renaming an org

Fixes

- > **Cloud API** - Does not require updating to latest Cloud Agent
 - Fixed the Advanced Container Create dialog not sending all of the entered container parameters
 - HTTP Push outputs now auto-populate DASH time service by default to avoid configuration issues
 - Removed the Processor State dialog for Max, simply showing the status based on GPU throttling

2024-09-04 V1.19.0

Feature Additions

- > **Cloud Agent, API, and UI** - Requires updating to Cloud Agent V1.19.0
 - **Docker Container Directory**
 - Devices with Docker enabled via licensing can now take advantage of the Videon Docker Container Directory for ease of installation and management of Videon-verified Docker containers on Videon devices. Read more here: [Videon's LiveEdge Container Directory](#)

Improvements and General Maintenance

- > **Cloud UI** - Does not require updating to Cloud Agent V1.19.0
 - **License details**
 - Users can now click on a license's name to see a list of the features that the license enables when assigned to a device
