

V1.23.0 Release Notes - LiveEdge® Cloud Control

2025-02-04 V1.23.0

Feature Additions

- > **Cloud UI** - Does not require updating to latest Cloud Agent
 - **Release notes**
 - When updating device software, a link is provided to reference the latest release notes
- > **Cloud Agent, API, and UI** - Does not require updating to latest Cloud Agent
 - **Docker logs download**
 - Users can now view Docker container logs in standard device log exports
 - **Dynamic Graphic Overlay configuration – Max only**
 - Users can now configure Dynamic Graphic Overlay for Inputs when provided the respective license

Fixes

- > **Cloud Agent** - Does not require updating to latest Cloud Agent
 - Fixed an issue where saving only 1 DNS address failed to save
 - Storage device update events are now filtered out of device events to reduce event spam
 - Fixed an issue where 720p was not available as an Encoder scaling resolution
 - Any generic output URL entry is now simply labelled Generic instead of Generic RTMP
